INDEX TO VOLUME IV

Authors

- Allen, C. F. H.—Cyclohexanone-benzil, 264.
- Allen, F.—The unitary behavior of the nervous system, 92.
- Alty, T.—See Middleton, W. E. K.
- Alty, T. and Nicoll, F. H.—The interchange of molecules between a liquid and its vapor, 547.
- Anderson, J. M.—Duration of metastable states, 312.
- Ashton, M. R.—See Hutchinson, A. H.
- Baker, A. D.—A study of the male genitalia of Canadian species of Pentatomidae, 148.
- Barnes, W. H. and Helwig, G. V.—The space-group of potassium dithionate, 565.
- Basterfield, S., Wilson, C. V. and Greig, M. E.—Studies in urethanes. V. New acyl di-urethanes and their reactions with ammonia and amines, 361.
- Bergsteinsson, H. N.—See Geddes, W. F.
- Binder, J. L., Filby, E. A. and Grubb, A. C.—Triatomic hydrogen, 330.
- Boomer, E. H. and Saddington, A. W.—On the hydrogenation of bitumen from the bituminous sands of Alberta. II, 517.
- Boyd, E. M. and Reed, G. B.—Gas-metal electrode potentials in sterile culture media for bacteria, 54.
Oxidation-reduction potentials in cultures of *Es. coli*, 605.
- Brauns, F.—See Hibbert, H.
- Brodie, B.—See Hatcher, W. H.
- Burton, A. C.—Note on a phenomenon connected with the aurora, 52.
- Coffin, C. C.—Some new physico-chemical apparatus, 540.
- Cooper, D. LeB. and Maass, O.—The density of carbon dioxide, 283. The density of sulphur dioxide, 495.
- Filby, E. A.—See Binder, J. L.
- Geddes, W. F., Goulden, C. H., Hadley, S. T. and Bergsteinsson, H. N.—Variability in experimental baking. I. The influence of mechanical moulding, 421, 449.
- Goulden, C. H.—See Geddes, W. F.
- Greig, M. E.—See Basterfield, S. and Hibbert, H.
- Grubb, A. C.—See Binder, J. L.
- Hadley, S. T.—See Geddes, W. F.
- Hanna, W. F.—Studies on the nature of rust resistance in wheat. V. Physiology of the host, 134.
- Hatcher, W. H. and Brodie, B.—The polymerization of acetaldehyde, 574.
- Hatcher, W. H. and Sturrock, M. G.—Conductivity data of aqueous mixtures of hydrogen peroxide and organic acids, 35.
- Helwig, G. V.—See Barnes, W. H.
- Henry, A. W.—The natural microflora of the soil in relation to the foot-rot problem of wheat, 69.
- Hibbert, H. and Brauns, F.—Studies on reactions relating to carbohydrates and polysaccharides. XXXVI. Structure of the levan synthesized by the action of *Bacillus subtilis* on sucrose, 596.
- Hibbert, H. and Greig, M. E.—Mechanism of organic reactions. III. The nature of the mechanism of migration of the acyl radical, 254.
- Hibbert, H. and Phillips, J. B.—The nature of the resins in jack pine (*Pinus banksiana*), 1.
- Hibbert, H. and Sankey, C. A.—Studies on lignin and related compounds. V. Action of halogens on lignin and wood, 110.
- Hibbert, H. and Taylor, K. A.—Studies on lignin and related compounds. VII. A kinetic study of the action of hypochlorous acid on spruce lignin and its bearing on the constitution of the spruce lignin molecule, 240.
- Hibbert, H., Tipson, R. S. and Brauns, F.—Studies on reactions relating to carbohydrates and polysaccharides. XXXIV. The constitution of levan and its relation to inulin, 221.

- Hibbert, H.**—See Tarr, H. L. A. and Taylor, K. A.
- Howlett, L. E.**—The Raman effect and chemical bonds in certain organic liquids, 79.
- Hutchinson, A. H. and Ashton, M. R.**—Specific effect of monochromatic light upon plasmolysis in paramecium, 614.
- Katz, M.**—See Whitby, G. S.
- Klugh, A. B.**—The effect of the ultra-violet component of sunlight on certain aquatic organisms. III, 483.
- Larmour, R. K. and Machon, F. D.**—The effect of bleaching on strength and color of Saskatchewan hard red spring wheat flour, 399.
- Linton, E. P. and Maass, O.**—The dielectric constants of hydrogen peroxide-ether and hydrogen peroxide-water-ether mixtures, 322.
- Maass, O.**—See Cooper, D. LeB., Linton, E. P. and Taylor, K. A.
- Machon, F. D.**—See Larmour, R. K.
- McKibbin, R. R.**—See Pugsley, L. I.
- Manske, R. H. F.**—Calycanthine. II. The degradation of calycanthine to N-methyltryptamine, 275.
The synthesis of some indol derivatives, 591.
- Middleton, W. E. K. and Alty, T.**—The effect of surface films on exploring electrodes in gas discharges, 498.
- Moore, W. H.**—A particular case of high frequency electron oscillations, 505.
- Morton, R.**—See Steacie, E. W. R.
- Nicoll, F. H.**—See Alty, T.
- Osborne, F. F.**—A possibly biogenic structure in Grenville limestone in Hastings County, Ontario, 570.
- Phillips, J. B.**—See Hibbert, H.
- Pugsley, L. I. and McKibbin, R. R.**—Calcium relationships of forage crops, 39.
- Reed, G. B.**—See Boyd, E. M.
- Reed, G. B. and Rice, C. E.**—Studies in the variability of tubercle bacilli. I. A rapid-growing bovine type, 389.
- Rice, C. E.**—See Reed, G. B.
- Robertson, J. K.**—Merton's method of measuring the half-width of a spectral source and the Fabry and Perot étalon, 305.
- Saddington, A. W.**—See Boomer, E. H.
- Sankey, C. A.**—See Hibbert, H.
- Steacie, E. W. R. and Morton, R.**—The thermal decomposition of gaseous propionaldehyde on the surface of platinum, 582.
- Sturrock, M. G.**—See Hatcher, W. H.
- Tarr, H. L. A. and Hibbert, H.**—Studies on reactions relating to carbohydrates and polysaccharides. XXXV. Polysaccharide synthesis by the action of *Acetobacter xylinus* on carbohydrates and related compounds, 372.
- Taylor, K. A.**—See Hibbert, H.
- Taylor, K. A., Maass, O. and Hibbert, H.**—Studies on lignin and related compounds. VI. The mechanism of aqueous halogenation, 119.
- Thompson, W. P.**—Chromosome homologies in wheat, rye and *Aegilops*, 624.
- Thomson, W. A.**—The photo-electric measurement and photographic recording of daylight, 559.
The photo-electric cell and electric clock as a means of recording the daily hours of bright sunshine, 299.
- Tipson, R. S.**—See Hibbert, H.
- Tory, H. M.**—Interim report on *Bacillus Calmette-Guérin*, 543.
- Whitby, G. S. and Katz, M.**—Studies of polymers and polymerization. II. The pyrolysis of polyindenes and the polymerization of diindene, 344.
III. The polymerization of eugenol, safrole and the corresponding iso-compounds, 487.
- Wilson, C. V.**—See Basterfield, S.

INDEX TO VOLUME IV

Subjects

- Abietic acids** in jack pine, 2, 17.
- Abnormal color vision**, 94.
- Absorption** in metastable states, 312.
of λ 7635 Å (argon), Decay curves of the, 318.
- Absorption spectrum** and Raman spectrum, 81.
- Acetaldehyde**
Effect of added benzene on polymerization of, 579.
Dilatometer for following polymerization of, 575.
Phosphoric acid as catalyst in polymerization of, 575.
Polymerization of (Hatcher and Brodie), 574.
- Acetic acid** and hydrogen peroxide, Conductivity of aqueous mixtures of, 35.
- Acetobacter xylinus**
on carbohydrates and related compounds, Polysaccharide synthesis by the action of, (Tarr and Hibbert), 372.
on certain carbon compounds, Optimum conditions for the production of the cellulose membrane formed by, 377.
Polysaccharide yield by action of A. xylinus on
arabinose, 384.
dextrin, 383.
erythritol, 385.
fructose, 384.
galactose, 384.
l-glucosan, 385.
glucose, 383.
glycerol, 384.
glycerol chlorhydrin, 385.
glycol, 384.
hexa-ethylene glycol, 385.
inulin, 383.
lactose, 383.
levan, 383.
maltose, 383.
mannitol, 385.
mannose, 384.
 α -methyl glucoside, 384.
 α -methyl glycerol, 385.
peptone, 385.
raffinose, 383.
rhamnose, 384.
starch, 383.
sucrose, 383.
tetra-ethylene glycol, 385.
xylose, 384.
- Acetonitrile**, Raman effect in, 82.
- 2-Acetyl-3-phenylindol**, 277.
- Acid** produced by action of *Acetobacter xylinus* on
amyl alcohol, 376.
arabinose, 376.
dextrin, 376.
erythritol, 376.
ethyl alcohol, 376.
fructose, 376.
galactose, 376.
glucose, 376.
glycerol, 376.
glycol, 376.
inulin, 376.
lactose, 376.
maltose, 376.
mannitol, 376.
propyl alcohol, 376.
raffinose, 376.
starch, 376.
sucrose, 376.
xylose, 376.
- Acrosternum hilaris**, 163.
External male genitalia of, 201.
- Actinomyces**
praecox, 70.
scabies, 70.
- Actinomycetes** in prevention of wheat footrot, 69, 74.
- Acyl di-urethanes** and their reactions with ammonia and amines, New, (Basterfield, Wilson and Greig), 361.
- Acyl migration**
Mechanism of, 254.
Theoretical deductions relating to, 259.
- Acyl radical**, Nature of the mechanism of migration of the, (Hibbert and Greig), 254.
- Adipyl-di-urethane**
Preparation of, 365.
Reaction with
ammonia, 368.
aniline, 369.
ethylamine, 369.
- Aedeagus** of Canadian species of Pentatomidae, 149.
Apateticus bracteatus, 171.
Chlorochroa uhleri, 172.
Coenus delius, 169.
Cosmopepla bimaculata, 171.
Euschistus euschistoides, 167.
Euschistus tristigmus, 169.
Perillus bioculatus, 172.
- Aegilops**, Chromosome homologies in wheat, rye and, (Thompson), 624.
- Einkhorns**
aucheri, 625.
bicornis, 625.

Aegilops

Einkhorns

- caudata, 625.
- comosa, 625.
- longissima, 625.
- speltoides, 625.
- squarrosa, 625.
- uniaristata, 625.

Emmers

- cylindrica, 625.
- ovata, 625, 626.
- triaristata, 625.
- triuncialis, 625.
- variabilis, 625.
- ventricosa, 625.

Vulgares

- crassa, 625, 628.
- turcomanica, 625.

Hybrids, Chromosome pairing in, 627.

×Triticum, Chromosome pairing in, 628.

Aelia americana, 162.

External male genitalia of, 196.

Aging of flour, Baking results obtained after, 412.

Summary of observations on, 415.

Agropyron villosum, 624.

Air on oxidation-reduction potential of glucose-broth cultures of Es. coli, Effect of, 611.

Air-metal potential in culture media, 55.

Alberta bituminous sands, Hydrogenation of, 517.

Algae in late Pre-Cambrian formations, Structures in crystalline Grenville limestone resembling those ascribed to, 570.

Alkali on rate of absorption of hypochlorous acid by glycol-lignin at 0°C., Effect of, 250, 251.

Allyl alcohol at 0°C., Action of hypobromous acid on, 124.

Action of hypochlorous acid on, 121.

Effect of catalysts on rate of addition of hypochlorous acid to,
hydrochloric acid, 123.
nitric acid, 123.
potassium chloride, 123.
sodium chloride, 123.
sodium sulphate, 123.
sulphuric acid, 123.
trichloroacetic acid, 123.

Aluminium chloride as catalyst in hydrogenation of bitumen, 538.

Amines, New acyl di-urethanes and their reactions with ammonia and, (Basterfield, Wilson and Greig), 361.

on di-urethanes, Action of primary, 363.

Ammonia, Action on

- adipyl-di-urethane, 368.
- di-urethanes, 363.
- glutaryl-di-urethane, 367.
- primary amines, 363.
- succinyl-di-urethane, 366.
- and amines, New acyl di-urethanes and their reactions with, (Basterfield, Wilson and Greig), 361.

Ammonium molybdate as catalyst in hydrogenation of bitumen, 518.

Amyl alcohol by Acetobacter xylinus, Acid produced from, 376.

2:6-Anhydro-fructofuranose, 226.

Aniline, Reaction with

- adipyl-di-urethane, 368.
- bromomalonyl-di-urethane, 370.
- glutaryl-di-urethane, 368.
- succinyl-di-urethane, 366.

Antimony pentachloride on polymerization of diindene, Catalytic effect of, 359.

Apateticus bracteatus, 156, 163.

Aedeagus, 171.

External male genitalia of, 206.

Apparatus

Combined gas heater and thermo-regulator, 542.

Some new physico-chemical, (Coffin), 540.

A "volumestat", 540.

Apparent molecular weight of carbon dioxide with temperature, Variation of, 297.

Aquatic organisms, Effect of ultra-violet component of sunlight on, 483.

Aqueous halogenation

of phenols, 128.

Mechanism of, (Taylor, Maass and Hibbert), 119.

Arabinose by action of Acetobacter xylinus, Acid produced from, 376.

Yield of synthetic polysaccharide from, 384.

Argon, Energy level diagram for, 317.

Purification of, 318.

Arthrostyli in ephemerids, 154.

Asphalt obtained from hydrogenation of Alberta bitumen, 529.

Asterias vulgaris, Effect of ultra-violet component of sunlight on, 484.

Atikokania, 572.

Atomic weight of sulphur, 497.

- Aurelia aurita flavidula**, Effect of ultra-violet light on, 483.
- Aurora**, Note on a phenomenon connected with the, (Burton), 52.
- Autoclave** for hydrogenation of bitumen, High-pressure, 519.
- Bacillus**
 coli, 55, 605.
 diphtheriae, 605.
 levaniformans, 222.
 mesentericus, 224, 596.
 subtilis, 392, 596.
 vulgatus, 223.
- Bacillus Calmette-Guérin**, 389, 543.
 Immunity, 544.
 Interim report on, (Tory), 543.
 Pathogenicity, 544.
 Proposals for future work, 544.
 Virulence, 544.
- Bacteria**
 Gas-metal electrode potentials in sterile culture media for, (Boyd and Reed), 54.
 in prevention of wheat foot-rot, 69.
 Soil, 73.
- Bacterium**
 aceti, 372.
 pasteurianum, 373.
 rancens, 373.
 xylinoides, 373.
 xylum, 373.
- Baking**, Variability in experimental. I. Influence of mechanical moulding, (Geddes, Goulden, Hadley, Bergsteinsson), 421.
- Baking quality**, Immediate effect of bleaching on, 405.
 Effect of bleaching on, 406, 408, 411, 413, 416.
- Baking score** after aging flour for one month, Increases in, 414.
 and crude protein of wheat, Coefficient of correlation of, 419.
- Banasa dimidiata**, 163.
 External male genitalia of, 201.
- Barkhausen-Kurz oscillations**, 505.
- Basic method**, Effect of bleaching on baking quality as shown by the, 406, 411, 416.
- Beef extract broth**, Gas-metal electrodes in, 55.
- Benzene** in polymerization of acetaldehyde, Effect of dry, 579.
 Evaporation of, 557.
- Benzoyl-1-methyltryptamine**, 281.
- Benzoyl-N-methyltryptamine**, 276, 279.
 Synthesis of, 280.
- Benzoyl radical**, Migration of, 255.
- Benzoylation of calycanthine**, 278.
- Benzyl alcohol**, Raman effect in, 82.
- Benzyl trichloroacetate**, Action of heat on, 257, 260.
- Benzylidene glycerol α -benzoate**, 255.
 β -benzoate, 255.
- 1, 3-Benzylidene glycerol 2-benzoate**, 255.
- Betachlor** as bleaching agent for flour, 403.
- Biogenic structure in Grenville limestone** in Hastings County, Ontario, A possibly, (Osborne), 570.
- Bittacus pilicornis**, 155.
- Bitumen**
 Autoclave for hydrogenation of, 519.
 from the bituminous sands of Alberta, II. On the hydrogenation of, (Boomer and Saddington), 517.
 Properties of, 518.
 Vicking field gas used in hydrogenation of, 518.
- Blasturus cupidus**, 154.
- Bleaching**
 Betachlor used in flour, 403.
 Comparison of artificial and natural, 415.
 flour with chlorine, Apparatus for, 401.
 Novadel used in flour, 400.
 on baking quality, Effect of, 405, 406, 408, 411, 413, 416.
 on crumb color, Effect of natural and artificial, 414.
 on strength and color of Saskatchewan hard red spring wheat flour, Effect of, (Larmour and Machon), 399.
 on the blending value of flour, Effect of, 415.
- Blending value of flour**, Effect of bleaching on the, 415.
- Blindness**, Color, 95.
- Bond**, Stretching force of a single, 85.
- Bovine tubercle bacilli**
 Colony types, R and S, 390, 391.
 Pathogenicity, 396.
 Studies in the variability of, I. (Reed and Rice), 389.
- Bread**, Influence of mechanical moulding on, 421.
- Bright sunshine**
 Comparative records of the hours of, 301.
 Photo-electric cell and electric clock as a means of recording the daily hours of, (Thomson), 299.

Brochymena affinis, 162.

External male genitalia of, 182.

Brochymena quadripustulata, 162.

External male genitalia of, 181.

Bromate method, Effect of bleaching on baking quality as shown by the, 408, 413.

Bromine

Addition to

diisoeugenol, 115.

diisosafrole, 115.

eugenol, 114.

isoeugenol, 115.

isosafrole, 115.

safrole, 114.

Bromine absorption by spruce meal, lignin and related compounds, Analytical results of, 116.

of fractions from pyrolytic decomposition experiments with polyindene, 358.
of some low polyindenes, 357.

Bromine water on sodium salt of lignin at 0°C. Action of, 252.

Bromoform, Raman frequencies in, 87.

Bromomalonaldy-urethane, Preparation of, 365.

Reaction with

aniline, 370.

ethylamine, 370.

Butyric acid in jack pine, 24.

n-Butyronitrile, Raman effect in, 82.

Calcium relationships of forage crops, (Pugsley and McKibbin), 39.

Calycanthine, Benzoylation of, 278.

II. The degradation of calycanthine to N-methyltryptamine, (Manske), 275.

2-Carbethoxy-3- β -phenoxyethyl-indol, 592.

Carbohydrates and polysaccharides,

Studies on reactions relating to,

XXXIV. Constitution of levan and its relation to inulin, (Hibbert, Tipson and Brauns), 221.

XXXV. Polysaccharide synthesis by the action of *Acetobacter xylinus* on carbohydrates and related compounds, (Tarr and Hibbert), 372.

XXXVI. Structure of the levan synthesized by the action of *Bacillus subtilis* on sucrose, (Hibbert and Brauns), 596.

N-carbomethoxy- β -(3-indolyethyl)-amine, 594.

Carbon and hydrogen, Longitudinal vibrations between, 85.

Carbon compounds by action of *Acetobacter xylinus*. Yield of synthetic polysaccharide from, 383.

Culture media used in polysaccharide formation with, 375.

Carbon dioxide, Apparent molecular weight and volume of a gram mole over a temperature range, 297.

The density of, (Cooper and Maass), 283.

Determination of mass of, 288.

Measurement of pressures in determination of density of, 286.

on electrode potentials in culture media, Effect of, 55.

Standardization of constant volume flask for determination of density of, 284.

Variation of apparent molecular weight with temperature, 297.

Carbon tetrachloride at 1.6°C., Evaporation of, 556.

Carbonyl group of cyclohexanone-benzil, Reactions of, 268.

Carotin, Extraction, 142

in leaf powder, Colorimetric determination of, 142.

Separation of xanthophyll from, 143.

Carotinoids from chlorophyll, Separation of, 143.

in leaves of seedlings of

Emmer, 142.

Kanred, 142.

Khapli, 142.

Kota, 142.

Kubanka, 142.

Little Club, 142.

Marquis, 142.

Mindum, 142.

Carpocoria remotis,

External male genitalia of, 188.

Catalase activity of wheat-leaf extracts of

Emmer, 136.

Kanred, 136.

Khapli, 136.

Kota, 136.

Kubanka, 136.

Little Club, 136.

Marquis, 136.

Mindum, 136.

Catalysts

Aluminium chloride, 536.

Ammonium molybdate, 531.

Antimony pentachloride, 359.

Hydrobromic acid, 124, 129.

Hydrochloric acid, 123, 129, 132, 248.

Molybdic anhydride, 523, 531.

Nitric acid, 124, 125, 129, 132.

Phosphoric acid, 574.

Platinum, 582.

Sodium chloride, 123.

Sodium hydroxide, 124.

Stannic chloride, 493, 494.

Sulphuric acid, 123, 359.

Catalysts, Polymerization, 359, 493, 594.

Catalysts for hydrogenation of bitumen, 523, 531, 536.

Catalysts for reaction of hypohalous acids with

Allyl alcohol, 123, 124.

Dipropenyl glycol, 124.

Fumaric acid, 125.

Glycol-lignin, 248.

m-Nitrophenol, 129.

Phloroglucinol, 132.

Resorcinol, 132.

Cellulose membrane formed by *A. xylinus*, Optimum conditions for, 377.

Cellulose-like polysaccharide by a typical strain of *A. xylinus*, Carbon compounds converted into a, 381.

Chain oscillation, Frequencies calculated from formula for a three body, 86.

Chateauguay district, Analysis of soil and hay from, 40.

Chlorine as bleaching agent for flour, 400. bleaching of flour, Apparatus for, 401. water on lignin, A kinetic study of the action of hypochlorous acid and, 242.

***m*-Chlorobenzoyl-N-methyltryptamine**, 280.

Chlorochroa sayi, External male genitalia of, 187.

Chlorochroa uhleri, 162, 176. Aedeagus, 172. External male genitalia of, 187.

Chloroform, Raman frequencies in, 87.

Chlorohydrin formation, Mechanism of, 242.

Chlorophyll, Determination of, 141.

Extraction of, 141.

in leaves of seedlings of

Emmer, 142.

Kanred, 142.

Khapli, 142.

Kota, 142.

Kubanka, 142.

Little Club, 142.

Marquis, 142.

Mindum, 142.

Separation of carotinoids from, 143.

Chlorophyllides from carotinoids, Separation of, 141.

Chromosome

numbers of species of wheat, Aegilops and rye, Haploid, 625.

Chromosome

mating in hybrids

Intergeneric,

Aegilops × rye, 630.

wheat × Aegilops, 629.

wheat × rye, 630.

Intrageneric,

Aegilops, 628.

rye, 629.

wheat, 625.

Chromosome homologies in wheat, rye and Aegilops, (Thompson), 624.

Claspers of Canadian species of Pentatomidae, 150, 164, 182.

Clouds, Effect on illumination produced by overhead, 562.

Clover hay from Chateauguay district, Analysis of red, 40, 43, 44.

Coefficient of correlation of baking score and crude protein of wheat, 419.

Coenus delius, 151, 163, 167, 176.

Aedeagus, 169.

External male genitalia of, 194.

Cold, Graphs for sensation of, 99. Sensation of, 98.

Collector current in gas discharges with time, Variation of, 500.

Collector voltage in gas discharges, Variation of rate of drift with, 502.

Collenia, 571.

Colony, R and S, in *Mycobacterium tuberculosis* bovis No. 599, 390, 391.

Colophenic acids in jack pine, 2.

Color blindness, 95.

Color values of samples of flour treated with bleaching agents, Gasoline, 404.

vision

Abnormal, 94.

Normal, 95.

Colors, Porter graphs for spectral, 93. Stimulation of eye with, 94.

Conductivity data of aqueous mixtures of hydrogen peroxide and organic acids, (Hatcher and Sturrock), 35.

Constant volume flask for determination of density of carbon dioxide, Standardization of, 284.

Contralateral stimulation of sense of taste, 96.

Copulation in the Pentatomidae, Act of, 175.

Copulatoria in insects, 154.

- Corona tube** with poisoned walls, Investigation of production of triatomic hydrogen in, 334.
- Cosmopepla bimaculata**, 162, 167.
Aedeagus, 171.
External male genitalia of, 198.
- Cosmopepla conspicularis**, 162.
External male genitalia of, 198.
- Critical frequency** of flicker of light, 92.
- Crumb color**, Effect of hand and machine moulding on, 429.
of natural and artificial bleaching, Effect on, 414.
- Cryptozoön**, 571.
- Culture media** employed in polysaccharide formation with carbon compounds, 375.
Gas-metal electrode potentials in, (Boyd and Reed), 54.
- Cumarone** from cyclohexanone-benzil, 266, 271.
- Current drift** in gas discharges, 499, 502.
- Cutaneous sensations**, 97,
Pain, 98.
Temperature, 98.
Touch, 97.
- Cyclohexanone**, Preparation of the cumarone from desyl chloride and, 271.
- Cyclohexanone-benzil**, (Allen), 264.
Chemical properties of, 265, 266, 267.
Halochromism of, 265.
Reactions with
acetyl chloride, 268.
acidic reagents, 269.
alkaline reagents, 265.
cyclopentanone, 267.

Learning process

- Graphs for, 105.
- Measurements of, 104.
- Plateaus in, 104.

Lepidoptera, 151.

Leptosphaeria herpotrichoides, 69.

Levan

- acetate, Preparation of, 230, 604.
- by action of *Acetobacter xylinus*, Yield of synthetic polysaccharide from, 383.
- by enzyme action, Rate of conversion of sucrose into, 229.
- Comparison of the triacetates of inulin and, 224.
- Comparison of trimethyl inulin and trimethyl, 225.
- Contiguous units of, 228.
- Constitution of, (Hibbert, Tipson and Brauns), 221.
- Dibasic dimethyl lactol acid from, 237.
- formed by action of *B. subtilis* and *B. mesentericus* on sucrose, Comparison of the properties of, 598.
- from sucrose by action of *B. subtilis*, Structure of, 596.
- from the acetate, Regeneration of, 231.
- Hydrolysis of, 230, 600.
- Hydrolysis of trimethyl, 233.
- Methylation of, 231, 601.
- Preparation of, 599.
- Properties of, 223, 229.
- triacetate, Preparation of, 230.

Levanase on sucrose, Action of, 223, 229.

Light, Critical frequency of flicker of, 92.
Weber's principle for, 106.

Lignin

- at 0°C., Action of bromine water on the sodium salt of, 252.

Lignin

- Action of hypochlorous acid on glycol, Influence of
 - alkali, 250, 251.
 - silver nitrate, 248.
 - hydrochloric acid, 248.
- Effect of hydrochloric and nitric acids on rate of absorption of hypochlorous acid by glycol-, 247.
- Effect of sodium hydroxide on rate of absorption of hypochlorous acid by glycol- 251.
- Rate of absorption of hypochlorous acid by glycol-lignin and methylated glycol-, 246.
- Bromine absorption by, 116.
- Evidence for groups in,
 - Ethylene linkages, 246.
 - Ketomethylene groups, 244.
 - Phenolic nuclei, 246.
- Freudenberg's structure for, 111.
- of bromine from carbon tetrachloride solution, Effect of hydrobromic acid on absorption by, 117.
- Unsaturated character of, 112.

Lignin and related compounds, Studies on,

- V. Action of halogens on lignin and wood, (Hibbert and Sankey), 110.
- VI. The mechanism of aqueous halogenation, (Taylor, Maass and Hibbert), 119.
- VII. A kinetic study of the action of hypochlorous acid on spruce lignin and its bearing on the constitution of the spruce lignin molecule, (Hibbert and Taylor), 240.

Lime

- deficiency in feed, Effect on animals of, 47.
- in hay, 41.
- requirement of soils, 45.

Limestone in Hastings County, Ontario, A possibly biogenic structure in Grenville, (Osborne), 570.

Limonene in jack pine, 28, 29.

Linolenic acid in jack pine, 24.

Liquid

- and its vapor, Interchange of molecules between a, (Alty and Nicoll), 547.
- Evaporation from the surface of a, 549.
- Reflection of molecules from the surface of a, 547.

Liquids, Raman effect and chemical bonds in certain organic, (Howlett), 79.

Little Club extract

- Carotinoids in, 142.
- Catalase activity of, 136.
- Chlorophyll in, 142.
- Diastase activity of, 139.
- Oxidase activity of, 140.

Little Club, Rate of respiration of leaves of, 145.

Loaf moulder

- Optimum adjustment of, 425, 450.
- Thomson Laboratory, 425.

Loaf volume

- after aging flour for one month, Increases in, 414.
- and crude protein of wheat, Coefficient of correlation of, 418.
- data, Analysis of variance for, 434.
- Effect of machine moulding on secular variation in, 463.
- Variability in the baking test and its relation to mean, 475.

Longitudinal vibrations between carbon and hydrogen, 85.

Lubricating oils obtained from bitumen by hydrogenation, 518.

Machilis, 154.

Machine moulding of dough vs. hand moulding by experienced operator, 427, 441, 456.

- by different operators, 444.
- on secular variation in loaf volume, Effect of, 463.

Mean judging scores with experienced operator for hand and, 429.

vs. hand moulding by experienced operator, 441.

Male genitalia of Canadian species of Pentatomidae, A study of the, (Baker), 148, 159.

- Mechanical moulding of doughs**, Influence of, 421.
- Mechanism of organic reactions**
III. The nature of the mechanism of migration of the acyl radical, (Hibbert and Greig), 254.
- Media** employed in polysaccharide formation from some carbon compounds, 375.
for bacteria, Gas-metal electrode potentials in sterile culture, 54.
- Menecles incertus**
External male genitalia of, 200.
- Menthone**, 267.
- Merton's method of measuring the half-width of a spectral source** and the Fabry and Perot étalon, 305.
- Metastable states**
Circuits used in investigating, 313.
Discharge tubes for investigating duration of, 316.
Duration of, (Anderson), 312.
- 7-Methoxy- β -(3-indolyl)-propionic acid**, 594.
- α -Methyl glucoside** by action of *Acetobacter xylinus*, Yield of synthetic polysaccharide from, 384.
- α -Methyl glycerol** by action of *Acetobacter xylinus*, Yield of synthetic polysaccharide from, 385.
- Methylated glycol-lignin** at 0°C., Rate of absorption of hypochlorous acid by glycol-lignin and, 246.
- Methylation of levan**, 231.
- γ -Methylfructoside**, Preparation of tetramethyl, 236.
- N-Methyltryptamine**
The degradation of calycanthine to, 275.
- Microflora of soil** in relation to the foot-rot problem of wheat, The natural, (Henry), 69.
- Migration of the acyl radical**, Mechanism of, 255.
of benzoyl radical, 255.
Theoretical deductions relating to acyl, 259.
- Mimosa pudica**, 614.
- Mindum extract**
Carotinoids in, 142.
Catalase activity of, 136.
Chlorophyll in, 142.
Diastase activity of, 139.
Oxidase activity of, 140.
- Mindum**, Rate of respiration of leaves of, 145.
- Mixture rule** with mole fraction hydrogen peroxide, Variation of aberration from the, 327.
- Molecular weight of sulphur dioxide**, 497.
- Molecules** between a liquid and its vapor, Interchange of, (Alty and Nicoll), 547.
- Molybdic anhydride** as catalyst in hydrogenation of bitumen, 518.
- Monochromatic light**
on rate of plasmolysis, Effect of
In sodium chloride solutions, 618.
In sucrose solutions, 618.
upon plasmolysis in paramecium, Specific effect of, (Hutchinson and Ashton), 614.
- Mormidea lugens**, 162.
- Motor effects of stimulation**, 103.
- Moulder for doughs**, Mechanical, 425.
Optimum adjustment of mechanical, 425, 450.
- Moulding of dough**
as factors in producing variability between bakers, Punching vs., 466.
by different operators, Machine vs. hand, 444.
by experienced operator, Machine vs. hand, 427, 441, 456.
on secular variation in loaf volume, Effect of machine, 463.

Muscles

Post-contraction of, 101.
Response of, 101.

Mutarotation in water of crystalline 1:3:4-trimethyl fructofuranose, 235.

Mycobacterium, 390.

leprae, 390.
phlei, 390.
tuberculosis bovis No. 599, 390.

Naphthenes obtained from bitumen by hydrogenation, 523.

Natural gas in hydrogenation of bitumen, 518, 533.

Neottiglossa undata

External male genitalia of, 197.

Nerve conduction, Graphs for, 104.

Nervous system, Unitary behavior of the, (Allen), 92.

Neuroptera, 151.

Nezara sp., 149.

Nitric acid

Catalytic effect upon reaction of hypobromous acid on
allyl alcohol, 124.
fumaric acid, 125.
m-nitrophenol, 129.

hypochlorous acid on
allyl alcohol at 0°C., 123.
phloroglucinol, 132.
resorcinol, 132.

on rate of absorption of hypochlorous acid by glycol-lignin-at 0°C., Effect of, 247.

Oxidation of 1:3:4-trimethyl γ -fructose with, 237.

Nitrile, Raman effect in nitriles,

aceto-, 82.
n-butyro-, 82.
phenylaceto-, 82.
propio-, 82.

p-Nitrobenzoyl-N-methyltryptamine, 280,

Nitrogen

on a mercury electrode in culture media, Effect of, 56.

on a platinum electrode in culture media, Effect of, 56.

through a glucose-broth culture of *Es. coli*, Effect on oxidation-reduction potential of passing, 610.

m-Nitrophenol and hypobromous acid, Effect of hydrobromic, hydrochloric and nitric acids on the rate of reaction between, 129.

3-Nitrophthalyl-di-urethane, Preparation of, 365.

Nopinic acid in jack pine, 29.

Normal color vision, 95.

Novadel as bleaching agent for flour, 400.

Oils, produced from bituminous sands by hydrogenation, 522.

Oils in jack pine, Essential, 3, 27.

Oleic acid in jack pine, 25.

Ophiobolus graminis, 69.

Organic reactions, Mechanism of

III. The nature of the mechanism of migration of the acyl radical, (Hibbert and Greig), 254.

Oscillations, Barkhausen-Kurz, 506.

A particular case of high frequency electron, (Moore), 505.
Peculiarities observed, 511.

Oxidase activity of wheat-leaf extracts of

Emmer, 140.
Kanred, 140.
Khapli, 140.
Kota, 140.
Kubanka, 140.
Little Club, 140.
Marquis, 140.
Mindum, 140.

Oxidation of benzoyl-N-methyltryptamine, 279.

of 1:3:4 trimethyl-fructose with nitric acid, 237.

Oxidation-reduction potentials

in cultures of *Es. coli*, (Boyd and Reed), 605.

of glucose-broth culture of *Es. coli*, Effect of gases on,
air, 611.
nitrogen, 610.

to growth rate of *Es. coli* in buffered broth, Relationship of, 607.

to rate of gas production in cultures of *Es. coli* in glucose broth, Relationship of, 608.

Oxygen

upon the formation of active hydrogen in discharge tubes,
Effect of, 335.

Ozone on the cumarone from cyclohexanone-benzil, Action of, 272.

Pain

Graphs for sensation of, 99.
Sensation of, 98.

Paraffin

Experiments on triatomic hydrogen with vacuum discharge tube coated with, 336.

wax obtained from hydrogenation of bitumen, 538.

Paraldehyde, Depolymerization of, 580.
used in preparation of acetaldehyde, 574.

Paramecium caudatum, 615.
Specific effect of monochromatic light upon plasmolysis in, (Hutchinson and Ashton), 614.

Pathogenes

Fusarium graminearum, 69.
Helminthosporium sativum, 69.
Leptosphaeria herpotrichoides, 69.
Ophiobolus graminis, 69.
Wojnowicia graminis, 69.

Pentatomidae

Aedeagus and claspers of, 165.
Study of the male genitalia of Canadian species of, (Baker), 148.
Acrosternum hilaris, 201.
Aelia americana, 196.
Apateticus bracteatus, 206.

Podisus serieventris, 209.
Thyanta custator, 200.
Trichopepla atricornis, 186.
Trichopepla semivittata, 184.
Zicrona caerulea, 210.

Peptone by action of *Acetobacter xylinus*,
Yield of synthetic polysaccharide from,
385.

Peracids, 35.

Perchlorate with cyclohexanone-benzil, At-
tempted preparation of a, 273.

Peribalus limbolarius, 177.
External male genitalia of, 184.

Perillus bioculatus, 162, 166, 167, 177.
Aedeagus, 172.
External male genitalia of, 205.

Perillus circumcinctus

External male genitalia of, 206.

Phenylacetoneitrile, Raman effect in, 82.

Phenyl ethyl trichloroacetate, Action of
heat on, 257, 260.

3-Phenylindol, 278.

Phenylmalonyldi-urethane, Preparation
of, 362, 365.

Phenols, Aqueous halogenation of, 128.

Phloroglucinol at 0°C., Action of hypo-
chlorous acid on, 132.

Phosphoric acid on polymerization of ace-
taldehyde, Catalytic effect of, 574.

Phosphorus

deficiency in feed, Effect on animals of,
47.
in hay, 45.

Photo-electric cell and electric clock as a
means of recording the daily hours
of bright sunshine, (Thomson), 299.

**Photo-electric measurement and photo-
graphic recording of daylight**,
(Thomson), 559.

Photographic recording of daylight,
Photo-electric measurement and,
(Thomson), 559.
Daylight records, 562, 563.

Physico-chemical apparatus,
Combined gas heater and thermoregu-
lator, 542.
Some new, (Coffin), 540.
A "volumestat", 540.

Pimaric acids in jack pine, 2.

α -Pinene in jack pine, 28.

β -Pinene in jack pine, 28, 29.

Pinus banksiana, 1.

Pinus palustris, 2.

Pitch

from bitumen, Hydrogenation of residual
oil and, 535.
obtained by the hydrogenation of
bitumen, 527.

Plasmolysis in paramecium

after irradiation with rate of growth
during irradiation, Comparison of
the rate of, 619.
in sodium chloride solutions, 616, 618.
in sucrose solutions, 616, 618.
Specific effect of monochromatic light
upon, 614.

Plastic sulphur as testing agent for triato-
mic hydrogen, 337.

Plateaus of learning, Examination of, 104.

Platinum
on thermal decomposition of gaseous propionaldehyde, Catalytic effect of, 582.
potential in culture media, 54.
Thermal decomposition of gaseous propionaldehyde on the surface of, (Stearie and Morton), 582.

Pneumococci, 605.

Podisus maculiventris, 163, 167, 176.
External male genitalia of, 208.

Podisus modestus,
External male genitalia of, 209.

Podisus placidus,
External male genitalia of, 210.

Podisus serieventris, 176.
External male genitalia of, 209.

Polyeugenol
Bromine absorption, 492.
Preparation, 493.

Polyindenes
Bromine absorption of some low, 357.
Bromine absorption of fractions from pyrolytic decomposition experiments with, 358.
Distillation of, 345.
Effect of heat on, 347, 357.
of high molecular weight, 354.
of low molecular weight, 356.
Products of distillation of
diindene, 345.
indene, 345.
low polymers, 345.
triindene, 345.
truxene, 345.
Pyrolysis of, (Whitby and Katz), 344.
Pyrolytic distillation of, 353.

Polyisoeugenol
Bromine absorption, 492.
Preparation, 493.

Polyisosafole
Bromine absorption, 492.
Preparation, 493.

Polymerization of
acetaldehyde, (Hatcher and Brodie), 574.
Bimolecular constants, 577.
Dilatometer for following, 575.
Effect of added benzene on, 579.
Phosphoric acid as catalyst in, 575.
Trimolecular constants, 578.
Comparative rates of,
Eugenol, 488.
Isoeugenol, 488.
Isosafole, 488.
Safole, 488.

Polymerization of
diindene, (Whitby and Katz), 344, 359.
eugenol, safole, and the corresponding iso-compounds, (Whitby and Katz), 487.
by heat, 490.
by stannic chloride, 489, 493.

Polymers and polymerization, Studies of
II. The pyrolysis of polyindenes and the polymerization of diindene, (Whitby and Katz), 344.
III. The polymerization of eugenol, safole and the corresponding iso-compounds, (Whitby and Katz), 487.

Polysaccharide
for chemical investigations, Preparation of a cellulose-like, 387.
yield by action of *Acetobacter xylinus* on
arabinose, 384.
dextrin, 383.
erythritol, 385.
fructose, 384.
galactose, 384.

Styli in ephemerids, Segmented, 154.

Styligers in *Blasturus*, 154.

Succinyldi-urethane

Preparation of, 364.

Reaction with

ammonia, 366.

aniline, 366.

ethylamine, 366.

Sucrose by *Acetobacter xylinus*, Acid produced from, 376.

by action of *Acetobacter xylinus*, Yield of synthetic polysaccharide from, 383.

Comparison of properties of synthetic levan obtained by action of *B. subtilis* and *B. mesentericus*, respectively, on, 598.

into levan by enzyme action, Rate of conversion of, 229.

Preparation of levan by action of *B. subtilis* on, 599.

solutions, Plasmolysis of irradiated *Paramecium caudatum* in, 616, 618.

Sulphur

as testing agent for triatomic hydrogen, Plastic, 337.

Atomic weight of, 497.

Density of, (Cooper and Maass), 495.

in oils obtained by hydrogenation of bitumen, 523.

Sulphur dioxide

Density of, (Cooper and Maass), 495.

Isothermals, 495, 496, 497.

Mean values of molecular weights corresponding to mean pressures, 496.

Purification, 495.

Sulphuric acid, Catalytic effect on

action of hypochlorous acid on dipropenyl glycol, 124.

addition of hypochlorous acid to allyl alcohol, 123.

polymerization of diindene, 359.

Sunlight on aquatic organisms, Effect of ultra-violet component of, (Klugh), 483.

Sunshine, The photo-electric cell and electric clock as a means of recording the daily hours of bright, (Thomson), 299.

Surface films on exploring electrodes in gas discharges, Effect of, (Middleton and Alty), 498.

Tactile sensation, Deep, 97.

Superficial, 97.

Taste

Graphs for sensation of, 96.

Sense of, 95, 107.

Terpenes in jack pine, 28.

Tesseratoma, 149.

Tetra-ethylene glycol by action of *Acetobacter xylinus*, Yield of synthetic polysaccharide from, 385.

Tetramethyl γ -fructose, Preparation of, 236.

Tetramethyl γ -methylfructoside, Preparation of, 236.

Theory in connection with half-width problems, Fundamental, 306.
of Raman effect, 80.

Thermal decomposition of gaseous propionaldehyde on the surface of platinum, (Steacie and Morton), 582.
Apparatus for investigating, 583.

Pressure increase accompanying reaction, 585.

Products of the reaction, 585.

Time for 17.5 and 35% decomposition at various temperatures, 586, 587.

Thermal effects of stimulation, 103.

Thermo-polymerization of diindene, 351.

Thermoregulator, A combined gas heater and, 542.

Three body chain oscillation, Frequencies calculated from formula for a, 86.
